

work experience

Can you offer our students work placement opportunities?

We offer a range of vocational courses and work experience is an integral part of the student's learning.

Our courses cover skills in most business sectors, so students can fill a variety of roles within your organisation.

Benefits to you

- No cost
- Minimal paperwork
- Many students already have experience in the workplace
- Students will be matched to your requirements – pre-placement interviews are offered and recommended
- You are playing your part in providing local students with essential skills – helping to build an efficient workforce for the future
- You may solve recruitment needs by finding a student to take on permanently!

Further opportunities

We are keen to provide our students with additional opportunities, linking their studies to real-life work situations. This may include visits to your organisation, or talks to groups of students.

Can you help? If you would like to find out more about working with our students please get in touch.
